SKILLS & TOOLS

DATA & BI

Python · SQL · R · SAS · Excel VBA · Tableau · Power BI · Pandas · NumPy · Statistics · Modelling · Reporting

AUTOMATION & SYSTEMS

Playwright · FastAPI · SQLite · Pydantic · Scraping · Pipelines · PowerShell · Workflows · File processing

WEB & PRODUCT

React · TypeScript · Vite · Next.js · Tailwind CSS · Prototyping · Design system · Product logic · Canva · CapCut

SOFT SKILLS

Rigour · Autonomy · Synthesis · Teaching · Reliability · Adaptability · Clear communication

LANGUAGES

French	Native
English	B2
Spanish	B1

INTERESTS

Chess · Calisthenics · Reading & writing · Philosophy · Psychology · Digital creation

Nathan Azoulay

DATA & BUSINESS ANALYTICS · AUTOMATION · DIGITAL PRODUCT BUILDER

PROFILE

Hybrid profile across data analytics, automation, actuarial finance and digital product building, trained in applied mathematics, actuarial science and business analytics. I enjoy turning complex problems into clear systems: analysing, structuring, automating, visualising and delivering useful tools. My background combines experience in insurance, public finance, data analysis, teaching and personal projects focused on data, AI, web and product building under the NA Studio identity.

PROFESSIONAL EXPERIENCE

Data Science & Actuarial Intern Apr. – Aug. 2024
SADA Assurances — Finance & Control Department

- Data analysis and exploitation in a demanding insurance and financial environment (R, SAS, Excel).
- Modelling, control and reporting work with high standards of reliability and analytical rigour.

Data Analyst Intern May – Jul. 2022
Iterato

- Data analysis, cleaning, visualisation and structuring · supplier performance evaluation (Python, SQL, Excel).
- Process improvement, bug fixing and operational workflow reliability.

Operations Assistant & Analysis Support May – Aug. 2023
Dental Laboratory

- Precise, quality-oriented work · operational tracking, information structuring and internal process organisation.

Administrative Agent — Case Management 2016–2019 · 2025–2026
Direction Générale des Finances Publiques (DGFIP)

- Handling sensitive data, case tracking, document verification in public and fiscal environments.
- Multiple departments: Treasury, Payroll, Asset Management, Business Audit Brigade.

Mathematics Tutor / Private Teacher 2017 – 2024
Universities & private tutoring

- Student support from secondary to university level — pedagogy, synthesis, structured communication.

EDUCATION

MSc Business Analytics Ongoing
Swiss Business School

Dashboards · Statistical analysis · Visualisation · Decision logic · Applied projects

Master in Banking, Finance & Actuarial Science
University of Montpellier · 2023–2024

Actuarial science · Risk modelling · Finance · Insurance · SAS · R · Excel VBA

Master in Applied Mathematics for Engineering
Université Toulouse III – Paul Sabatier · 2021–2023

Modelling · Simulation · Data science · Programming · Complex systems

Bachelor of Mathematics
Université des Antilles

Analysis · Algebra · Probability · Statistics · Formal reasoning

SELECTED PROJECTS

Reach — Outreach & Data Automation

Automation platform to identify, structure, qualify and contact prospects — scraping, pipelines, workflows, use case LC Paper Girona.

LiliBot — LinkedIn Application Assistant

LinkedIn application automation bot — Playwright, browser automation, tracking, filtering, coherent application workflows.

Onepager Studio — Web & Product Builder

One-page website generator from structured inputs — design system, product logic, structured content, static export.

TheoForge — AI · Research & Synthesis

Tool for extracting, organising and summarising reliable sources — AI, fact-checking, structured synthesis, noise reduction.

ML for Insurance Reserving — Actuarial · Machine Learning

Application of ML methods to insurance reserving problems — predictive modelling, risk analysis.

Brent 2023 · Flag & Faith · YTBX — Data Science · Econometrics · Video

Brent 2023 econometric study · Religion/flag classifier (Python) · Lightweight video extraction and cutting tool.
