PROFILE

Hybrid profile bridging quantitative analysis and business understanding, trained in applied mathematics, actuarial science and Business Analytics. I structure problems, clarify needs, identify the right indicators and turn heterogeneous data into decision-ready analysis. I place particular emphasis on documentation, traceable assumptions and clear communication between business and technical teams.

Target positioning: business analysis, requirements framing, process improvement, KPIs, management reporting and decision support.

BUSINESS ANALYSIS & STRATEGY SKILLS

Business analysis & requirements	Interviews and reformulation, issue framing, business rules, process mapping, scope and acceptance criteria.
Data & decisions	Descriptive analysis, KPIs, segmentation, dashboards, gap interpretation and data-supported recommendations.
Documentation & communication	Summaries, specifications, presentation materials, meeting notes, business-technical interface and simplification.
Tools	SQL, Python, Excel, Tableau, Power BI, PowerPoint, Word, collaborative tools and structured documentation.

PROFESSIONAL EXPERIENCE

Business Analysis Intern - Finance & Reporting <i>SADA Assurances - Finance & Control Department</i> - Analysed and structured financial and actuarial data for control, reserving and reporting work. - Produced summaries, consistency checks and clear outputs with R, SAS and Excel.	Apr. - Aug. 2024
Analyst Intern - Data & Process <i>Iterato</i> - Analysed collection and reporting processes, identified friction and structured data-based improvements. - Built indicators and reporting outputs for supplier quality and performance monitoring.	May - Jul. 2022
Operations Assistant & Quality Tracking <i>Dental Laboratory</i> - Structured production and quality information in a demanding technical environment. - Contributed to gap monitoring and internal process organisation.	Apr. - Aug. 2023
Administrative Agent - Analysis & Case Management <i>Direction Générale des Finances Publiques (DGFIP)</i> - Analysed, verified and tracked complex cases in regulated public-finance and tax settings. - Identified inconsistencies, structured information and followed precise procedures.	Summers 2016 · 2017 · 2018
Mathematics Tutor <i>Universities & private tutoring</i> Simplified complex concepts, diagnosed needs and adapted communication to each stakeholder.	2017 - 2024

EDUCATION

MSc Business Analytics <i>Swiss Business School</i> Data-driven business analysis, decision modelling, visualisation, performance indicators and applied projects.	2025 - 2026 · Ongoing
Master's in Banking, Finance & Actuarial Science <i>University of Montpellier</i> Financial analysis, risk, actuarial science, reporting, control and understanding of regulatory constraints.	2023 - 2024
Master's in Applied Mathematics for Engineering - MAPI3 <i>Toulouse III - Paul Sabatier University</i> Structured problem solving, system modelling, optimisation and programming.	2021 - 2023
Bachelor's in Mathematics <i>University of the Antilles</i> Formal logic, probability, statistics and analytical reasoning.	2017 - 2020

SELECTED BUSINESS ANALYSIS PROJECTS

Brent 2023 - Econometric Study ARIMA / GARCH · Stationarity tests · Visualisation · Interpretation Study of Brent crude dynamics in 2023 to separate trend, volatility and isolated shocks. Work presented: series preparation, exploration, statistical testing, time-series modelling and synthesis with economic interpretation.	TIME SERIES
Reach - Prospecting System Framing Needs · Business rules · Pipeline · KPIs · Documentation System structuring prospect identification, qualification and tracking through explicit rules and channel decisions. Business angle: needs formalisation, status and rule definition, action segmentation, monitoring indicators and workflow documentation.	BUSINESS ANALYSIS
Project OS - Project Steering & Documentation Priorities · Tasks · Milestones · Documentation · Tracking Personal project system linking objectives, tasks, decisions, documents and progress. Documented functions: prioritisation, deadline tracking, continuous documentation, decision log and consolidated progress view.	ORGANISATION & REPORTING
Onepager Studio - Structured Page Generator React · TypeScript · Design system · Structured content · Export Tool generating pages from structured inputs through reusable components, visual consistency and fast production. Work presented: content modelling, component definition, journey organisation, layout rules and coherent deliverable generation.	WEB & PRODUCT

APPROACH

Understand → formalise → measure → recommend: clarify the expected decision, map the process, make rules and assumptions explicit, choose useful indicators and produce a traceable recommendation.
--

LANGUAGES & ADDITIONAL INFORMATION

Languages	French: native · English: B2 · Spanish: B1.
Strengths & interests	Synthesis, critical thinking, clear communication, reliability · Chess, psychology, reading and project organisation.

Project details and sample deliverables are available through the [portfolio](#), [GitHub](#) and [LinkedIn](#).
