EXPERTISE na-studio.pages.dev/expertise/ai-automation

PROFILE

Automation-oriented builder trained in applied mathematics, data and Business Analytics. I turn repetitive tasks and fragmented flows into simple, documented and genuinely usable internal tools. My approach combines Python scripting, data processing, browser automation, APIs and careful LLM integration, with reliability, maintainability and operational usefulness as the main priorities.

Target positioning: process automation, internal tools, data pipelines, lightweight AI assistants, local-first workflows and functional prototypes.

AUTOMATION & INTERNAL TOOLS SKILLS

Automation & workflows	Workflow design, processing scripts, batch jobs, automated collection, execution rules, action queues and logging.
AI & local tools	Ollama, OpenRouter, structured prompts, assisted extraction, LLM pipelines, simple agent logic and output control.
Technical stack	Python, FastAPI, SQLite, Pydantic, Playwright, PowerShell, REST APIs, SQL, React, TypeScript and Git.
Delivery method	Need framing, direct prototype, dry-run, error handling, documentation, functional testing and iterative improvement.

PROFESSIONAL EXPERIENCE

Data Science & Automation Intern <i>SADA Assurances - Finance & Control Department</i> - Automated and strengthened analytical and reporting treatments with R, SAS and Excel VBA. - Structured recurring tasks, consistency checks and treatment documentation in an insurance environment.	Apr. - Aug. 2024
Data Analyst & Process Intern <i>Iterato</i> - Automated data collection, cleaning and structuring with Python, SQL and Excel. - Turned manual reporting activities into more reproducible and controllable flows.	May - Jul. 2022
Operations Assistant & Analysis Support <i>Dental Laboratory</i> - Organised tracking data and supported internal process reliability in a technical environment. - Structured information used for quality control and operational monitoring.	Apr. - Aug. 2023
Administrative Agent - Internal Tools & Data <i>Direction Générale des Finances Publiques (DGFIP)</i> - Processed large information volumes through internal tools across several public-finance departments. - Performed document checks, followed strict procedures and maintained reliable case records.	Summers 2016 · 2017 · 2018
Mathematics Tutor <i>Universities & private tutoring</i> Created adapted materials and structured learning paths - useful logic for clear, guided tool design.	2017 - 2024

EDUCATION

MSc Business Analytics <i>Swiss Business School</i> Programming for analytics, statistical learning, visualisation, decision logic and applied Python projects.	2025 - 2026 · Ongoing
Master's in Banking, Finance & Actuarial Science <i>University of Montpellier</i> Automation of actuarial and financial calculations, R, SAS, Excel VBA, reporting and control.	2023 - 2024
Master's in Applied Mathematics for Engineering - MAPI3 <i>Toulouse III - Paul Sabatier University</i> Programming, optimisation, simulation, modelling, complex systems and algorithm construction.	2021 - 2023
Bachelor's in Mathematics <i>University of the Antilles</i> Foundations in logic, algebra, probability and algorithmic reasoning.	2017 - 2020

SELECTED AUTOMATION & INTERNAL TOOLS PROJECTS

Reach Automation - Qualification Pipeline Python · SQL / SQLite · Scraping · Deduplication · Scoring · Workflows Pipeline collecting and enriching public and web data to structure, qualify and prioritise prospects. Documented functions: normalisation, multi-key deduplication, data-quality and contactability scoring, action queue, channel rules and logs.	DATA & AUTOMATION
TheoForge - Source Research & Structuring Python · LLM / NLP · PDF / Word · Metadata · Citations System designed to import sources, retain provenance and excerpts, and organise evidence for academic or analytical research. Documented functions: Source / Excerpt / Citation models, status and reliability classification, assisted extraction, noise reduction and traceable synthesis.	AI & DATA ENGINEERING
YTBX - YouTube Data Processing Python · Playwright · Extraction · Structuring · Reporting Lightweight tool extracting and processing video data to structure metadata and prepare analysis. Documented functions: controlled collection, information cleaning, structured outputs and preparation of targeted monitoring or extraction.	SCRAPING & DATA
Project OS - Project Steering & Documentation Priorities · Tasks · Milestones · Documentation · Tracking Personal project system linking objectives, tasks, decisions, documents and progress. Documented functions: prioritisation, deadline tracking, continuous documentation, decision log and consolidated progress view.	ORGANISATION & REPORTING

APPROACH

Concrete problem → reliable flow → usable tool: identify manual steps, define inputs and rules, build a first testable chain, add controls and logs, then document usage and limitations.
--

LANGUAGES & ADDITIONAL INFORMATION

Languages	French: native · English: B2 · Spanish: B1.
Strengths & interests	Pragmatism, autonomy, systemic thinking, rigour · Digital creation, chess, reading and project organisation.

Project details and sample deliverables are available through the [portfolio](#), [GitHub](#) and [LinkedIn](#).
