EXPERTISE na-studio.pages.dev/expertise/operations-pmo

PROFILE

Organised and rigorous profile with a background in applied mathematics and data analysis. I have developed a strong ability to structure information, coordinate dependent steps and produce reliable deliverables in demanding environments. I like making work visible: ownership, priorities, deadlines, risks, decisions and next actions, supported by documentation clear enough to preserve continuity.

Target positioning: operations coordination, junior PMO, activity tracking, priority management, reporting, documentation and process improvement.

COORDINATION & OPERATIONS SKILLS

Coordination & tracking	Planning, tasks, priorities, deadlines, dependencies, follow-ups, multi-party coordination and next-action management.
Reporting & documentation	Dashboards, activity reporting, meeting notes, summaries, procedures, decision logs and presentation materials.
Process & quality	Workflow mapping, controls, exception handling, continuous improvement, reliability and traceability.
Tools	Excel, PowerPoint, Word, SQL, Python, task tools, collaborative documentation, dashboards and Git.

PROFESSIONAL EXPERIENCE

Operational Analysis & Reporting Intern <i>SADA Assurances - Finance & Control Department</i> - Contributed to reporting, data control and indicator monitoring in a demanding financial environment. - Met formats and deadlines, documented treatments and produced reliable summaries.	Apr. - Aug. 2024
Data Coordination & Tracking Intern <i>Iterato</i> - Structured operational databases, monitored indicators and improved collection and reporting flows. - Organised information needed to track supplier quality and performance.	May - Jul. 2022
Operations Assistant & Quality Tracking <i>Dental Laboratory</i> - Tracked activity, organised technical information and supported quality control in a production environment. - Contributed to process continuity and structured gap reporting.	Apr. - Aug. 2023
Administrative Agent - Case Management <i>Direction Générale des Finances Publiques (DGFIP)</i> - Managed cases and processed high information volumes in a strict procedural setting. - Prioritised work, verified documents and reliably updated internal tools.	Summers 2016 · 2017 · 2018
Mathematics Tutor <i>Universities & private tutoring</i> Planned sessions, adapted content, tracked progress and independently managed long-term learner relationships.	2017 - 2024

EDUCATION

MSc Business Analytics <i>Swiss Business School</i> Analytical project management, decision reporting, visualisation and result-oriented process structuring.	2025 - 2026 · Ongoing
Master's in Banking, Finance & Actuarial Science <i>University of Montpellier</i> Coordination of quantitative work, financial indicator tracking and regulated reporting.	2023 - 2024
Master's in Applied Mathematics for Engineering - MAPI3 <i>Toulouse III - Paul Sabatier University</i> Methodological rigour, team projects, structured resolution and technical documentation.	2021 - 2023
Bachelor's in Mathematics <i>University of the Antilles</i> Logic, structured reasoning and quantitative information organisation.	2017 - 2020

COORDINATION, PMO & OPERATIONS PROJECTS

Reach - Multichannel Workflow Coordination <i>Priorities · Action queues · Rules · Logs · Tracking</i> Workflow connecting collection, enrichment, qualification and contact actions in a traceable operating chain. Operations angle: sequencing, dependency management, channel execution modes, incident tracking and action traceability.	OPERATIONS
Project OS - Project Steering & Documentation <i>Priorities · Tasks · Milestones · Documentation · Tracking</i> Personal project system linking objectives, tasks, decisions, documents and progress. Documented functions: prioritisation, deadline tracking, continuous documentation, decision log and consolidated progress view.	ORGANISATION & REPORTING
Onepager Studio - Structured Page Generator <i>React · TypeScript · Design system · Structured content · Export</i> Tool generating pages from structured inputs through reusable components, visual consistency and fast production. Work presented: content modelling, component definition, journey organisation, layout rules and coherent deliverable generation.	WEB & PRODUCT
TheoForge - Source Research & Structuring <i>Python · LLM / NLP · PDF / Word · Metadata · Citations</i> System designed to import sources, retain provenance and excerpts, and organise evidence for academic or analytical research. Documented functions: Source / Excerpt / Citation models, status and reliability classification, assisted extraction, noise reduction and traceable synthesis.	AI & DATA ENGINEERING

APPROACH

Visibility → priority → execution → traceability: make ownership and dependencies explicit, identify the next action, track gaps, document decisions and maintain a consolidated progress view.
--

LANGUAGES & ADDITIONAL INFORMATION

Languages	French: native · English: B2 · Spanish: B1.
Strengths & interests	Organisation, reliability, autonomy, clear communication · Chess, project management, reading, fitness and digital creation.

Project details and sample deliverables are available through the [portfolio](#), [GitHub](#) and [LinkedIn](#).
