EXPERTISE na-studio.pages.dev/expertise

PROFILE

Hybrid profile across analysis, building and product coordination. I start from a need, structure it into rules and features, then translate it into a functional prototype or system before iterating. My quantitative background helps me frame problems and measure results; my personal projects have trained me to connect content, data, interfaces, automation and technical constraints without losing sight of real usage.

Target positioning: Product Ops, product building, MVP framing, specifications, business-tech-design coordination, prototypes and data-informed decisions.

PRODUCT & DELIVERY SKILLS

Product thinking	Need identification, jobs-to-be-done, features, prioritisation, user stories, product rules, MVP and acceptance criteria.
Delivery & coordination	Workstream breakdown, specifications, dependencies, execution tracking, documentation and business-tech-design trade-offs.
Prototype & build	React, TypeScript, Python, FastAPI, SQLite, testable interfaces, APIs, workflows and design systems.
Product data	Events, usage metrics, KPIs, SQL, Python, dashboards, friction analysis and data-informed decisions.

PROFESSIONAL EXPERIENCE

Data Analyst Intern - Process & Product Logic <i>Iterato</i> - Structured data, created indicators and improved internal workflows with Python, SQL and Excel. - Analysed treatment friction and sought clearer, more reproducible solutions.	May - Jul. 2022
Modelling & Decision Reporting Intern <i>SADA Assurances - Finance & Control Department</i> - Contributed to analytical deliverables requiring framing, reliable data, calculations and clear outputs. - Worked with R, SAS and Excel for control and decision-support purposes.	Apr. - Aug. 2024
Operations Assistant & Quality Tracking <i>Dental Laboratory</i> - Observed and structured production processes, quality monitoring and technical information. - Developed an understanding of usage constraints in a real operating environment.	Apr. - Aug. 2023
Administrative Agent - Internal Tools & Process <i>Direction Générale des Finances Publiques (DGFIP)</i> - Used internal tools and processed structured data in regulated public-sector processes. - Followed rules, handled exceptions and maintained document reliability.	Summers 2016 · 2017 · 2018
Mathematics Tutor <i>Universities & private tutoring</i> Designed adapted learning paths, iterated on materials and measured user understanding.	2017 - 2024

EDUCATION

MSc Business Analytics <i>Swiss Business School</i> Data-driven decision making, analytics, visualisation, applied projects and workflow structuring.	2025 - 2026 · Ongoing
Master's in Banking, Finance & Actuarial Science <i>University of Montpellier</i> Modelling, performance indicators, finance, risk and steering logic.	2023 - 2024
Master's in Applied Mathematics for Engineering - MAPI3 <i>Toulouse III - Paul Sabatier University</i> Complex problem solving, simulation, programming and algorithm design.	2021 - 2023
Bachelor's in Mathematics <i>University of the Antilles</i> Formal logic, structured reasoning and quantitative analysis.	2017 - 2020

SELECTED PRODUCT & PRODUCT OPS PROJECTS

Onepager Studio - Structured Page Generator React · TypeScript · Design system · Structured content · Export Tool generating pages from structured inputs through reusable components, visual consistency and fast production. Work presented: content modelling, component definition, journey organisation, layout rules and coherent deliverable generation.	WEB & PRODUCT
Project OS - Project Steering & Documentation Priorities · Tasks · Milestones · Documentation · Tracking Personal project system linking objectives, tasks, decisions, documents and progress. Documented functions: prioritisation, deadline tracking, continuous documentation, decision log and consolidated progress view.	ORGANISATION & REPORTING
Reach - Prospecting Automation Product MVP · Product rules · Workflows · CRM · Prioritisation Product combining collection, qualification and action orchestration to make prospecting structured and manageable. Product angle: module breakdown, channel rules, dry-run / draft / auto modes, action queue, priority criteria and iteration logic.	PRODUCT & AUTOMATION
Questline - Interactive Quiz Journey User flows · Structured content · Progression · Feedback Interactive quiz system organised around a guided journey, clear steps and immediate user feedback. Product angle: journey architecture, progression rules, content structure, interface states and feedback logic.	UX & PRODUCT

APPROACH

Need → rules → MVP → learning: clarify the user and problem, prioritise the essential flow, make rules explicit, build a testable prototype and iterate from observed friction and feedback.

LANGUAGES & ADDITIONAL INFORMATION

Languages	French: native · English: B2 · Spanish: B1.
Strengths & interests	Product thinking, autonomy, rigour, sense of use · Digital creation, project organisation, reading, chess and psychology.

Project details and sample deliverables are available through the [portfolio](#), [GitHub](#) and [LinkedIn](#).
